Encounters with Fibres and Fabrics

How does working with fibres/wool help you see things with new eyes?

What connections do you make when working with these materials?

How do these materials help you make connections to the land or place?

What stories live in these materials?

What inspires you when working with these materials?

- Nature
- A place
- An experience
- A memory
- Colour
- Texture

What elements of design are you playing with as you work with these materials?

How might fibres be transformed?

How do fabrics reveal pieces of self, identity, community, place or culture?

What concepts come to mind as you consider the processes and products associated with fibres and fabrics?

What is a fibre?

Fibre is natural or synthetic substance that is significantly longer than it is wide. Fibres are often used in the manufacture of other materials. Natural fibres have animal, plant or mineral origins.
